CASHCLIP · AB SUSTAINABILITY INVESTMENTS LLC

My Checklist.

Every check mark is a step closer. Baby steps. One at a time.

BUILD · GROW · SUSTAIN · SUCCEED

Started: June 7, 2026 Completed: _____

> BIG FISH — STARTING NOW

- [ ] **Build the Hub on the website (/sc-portal) — THE BIG FISH**
  Real AdMob + Unity earnings and live integration status, all in one place. This is what we build first.
- [ ] **OAuth 2.0 Playground — mint a fresh AdMob refresh token (right AFTER the Hub)**
  Google's Playground generates a new long-lived token so the Hub's revenue numbers actually load. Do this immediately after the Hub is built.
- [ ] **Regenerate the AdMob reporting token + publish the Google OAuth consent screen**
  The current token dies every 7 days while the consent screen is in 'Testing'. Publishing it stops the expiry. Real ad money is unaffected — this only unblocks the website numbers.

$ MONEY DISPLAY FIXES

- [ ] **Ship the Home "fake $0.05" balance fix (OTA to live build 29)**
  Home credits $0.05 locally per ad watched, so it shows more than the real Wallet. Fix is built & tested.
- [ ] **Fix the cents for coins — Chipley's fake "+$0.05" popup**
  Chipley celebrates a made-up dollar amount when an ad finishes. Make him show the REAL server reward (or no number). Bundle this with the Home fix.
- [ ] **Reseed Project + Customer Care — reset the fake numbers**
  Wipe the old local/fake balances so every user starts clean on real, server-tracked money.

+ WORKFLOWS / DASHBOARD

- [ ] **Production Hub**
  Operations dashboard for the live app.
- [ ] **Integration status board: Expo·Unity / GitHub·Replit / Vexo·Sentry**
  One panel showing each integration's live connection state at a glance.
- [ ] **Re-implement Chipley mascot — voice + more functionality**
  Needs a NEW App Store build (39+). Chipley's voice is a native module — it CANNOT ride an OTA onto build 29.

- [ ] **Remove the 3-hour hold on earnings**
  Drop the wait before earned points become claimable.

- [ ] **Ship small releases every ~2 hours (frequent OTA cadence)**
  Small, self-contained OTA update groups onto live build 29 — never big bundled packs.

$ AD PARTNERS — WIRE UP

- [ ] **Fix Unity's "wrong door" — rebuild the AdMob rewarded mediation group**
  Delete the dead duplicate group first, then point AdMob at Game ID 6110340 + placement Rewarded_IOs so Unity ads actually fill.

- [ ] **TikTok ads**
  Add as an ad partner / mediation source.

- [ ] **YouTube**
  Add as an ad partner / channel.

- [ ] **Tapjoy**
  Offerwall — verify live wiring end-to-end.

- [ ] **ironSource**
  Add the AdMob mediation adapter (native — ships in build 39+).

- [ ] **BitLabs**
  Survey partner — verify live wiring end-to-end.

! CRITICAL — Do First

- [ ] **Rebuild CashClip via EAS Build with clean credentials**
  Fixes the Invalid Signature — #1 blocker before resubmitting to Apple

- [ ] **Validate the new .ipa with Apple Transporter**
  Run before uploading to App Store Connect

- [ ] **Audit App Store metadata — swap 'earn money' for 'earn up to'**
  Check all screenshot captions and description bullets

~ WAITING ON APPLE

- [ ] **Apple review decision received**
  Currently 'Waiting for Review' — use the App Store Prep PDF if rejected

- [ ] **CashClip approved and live on the App Store**
  The big one.

$ REVENUE & PARTNERS

- [ ] **Apply for Acorns affiliate program**
  Once approved, wire your affiliate ID into the Invest My Earnings wallet screen
- [ ] **Apply for Stash affiliate program**
  Same integration — affiliate ID goes into wallet screen alongside Acorns
- [ ] **Send iBoard partnership pitch to Uber**
  Point them to /ventures/iboard — the full deck is live
- [ ] **Send iBoard partnership pitch to Lyft**
  Same page, same deck — two separate outreach contacts

+ GROWTH

- [ ] **Submit CashClip to Google Play Store**
  Android build needs its own submission — separate from iOS
- [ ] **Post launch script to Instagram**
  PDF is ready — copy, paste, post the moment Apple approves
- [ ] **Post launch script to Facebook**
  Same script — ready to go
- [ ] **Share iBoard ecosystem page with active investors**
  absustaininvest.com/ventures/iboard
