Onboarding Script & Company Scorecard Overview

Confidential — District Manager Use Only

DISTRICT MANAGER ONBOARDING SCRIPT

Use this script during your first 30 days in stores and with your team.

"Hi [Name], I'm [Your Name] — your new District Manager. I'm genuinely excited to be here and to learn from you. My first priority is listening, not directing. I want to understand what's working, what's getting in your way, and what your team needs to win. Let's set up a one-on-one in the next few days so we can really dig in together."

Tip: Visit stores unannounced within the first week. Walk the floor with the store manager — don't lead, follow. Observe before you advise.

When meeting store associates for the first time:

"Hey everyone, I'm [Your Name], and I'm your new District Manager. I just want to say — everything that matters in retail happens right here, on this floor, with you. You're the reason customers come back. I'm here to support you, remove obstacles, and make sure you have what you need to succeed. My door — and my phone — is always open."

Share your approach early. Consistency builds trust.

"There are three things I care about most as your DM: people, process, and performance — in that order. When we take care of our people and run clean, consistent processes, the numbers follow. I will hold you accountable, and I will also hold myself accountable to support you every step of the way."

- Communicate weekly — scheduled touch bases every Monday.
- Be transparent about scorecard results — no surprises.
- Celebrate wins publicly; coach privately, always.
- I will visit every store at least twice per month.

COMPANY SCORECARD OVERVIEW

Bealls measures district performance across five pillars. Each pillar carries weighted impact on your overall score.

01 SALES & TOP-LINE GROWTH — WEIGHT: 30%

- Comp Store Sales Growth vs. Plan (weekly/monthly)
- Net Sales per Square Foot — target: top-quartile for off-price
- Average Transaction Value (ATV) — drive basket size
- Units Per Transaction (UPT) — cross-sell and suggestive selling
- Year-over-Year Sales Trend — trailing 4-week rolling average

> *DM Script: "Your sales number tells us if we're relevant to the customer. Watch your ATV weekly — if it's dropping, your team needs coaching on add-on selling. If comp is negative three weeks in a row, we need a plan, not an explanation."*

02 GROSS MARGIN & PROFITABILITY — WEIGHT: 25%

- Gross Margin % vs. Plan — Bealls target: ~38–42% for off-price
- Markdown cadence compliance — taken on schedule, not early
- Sell-through rate — clearance velocity by category
- In-season margin vs. clearance margin split

> *DM Script: "We can't spend our way to profitable — we earn it through disciplined pricing and sell-through. If your markdown compliance is off, your margin will follow. Know your clearance floor and protect it."*

03 SHRINK & LOSS PREVENTION — WEIGHT: 20%

- Shrink % of Net Sales — district target: "d1.5%
- Cash over/short incidents — zero tolerance for repeated variances
- Refund fraud rate — returns without receipt trending
- LP observation compliance — required weekly LP walk documented
- Inventory accuracy — cycle count variance per store

> *DM Script: "Shrink is a profit killer — every dollar of shrink costs us three dollars in sales to break even. Hold your managers to the LP walk every single week. If shrink is trending up in a store, I want to know before the inventory count, not after."*

04 CUSTOMER EXPERIENCE & LOYALTY — WEIGHT: 15%

- Net Promoter Score (NPS) — district average vs. company benchmark
- Bealls Rewards enrollment rate — new sign-ups per week
- Google / in-store survey satisfaction rating (target: "e4.2&)
- Complaint resolution time — 24-hour close SLA
- Fitting room conversion rate (where tracked)

> *DM Script: "Our customer is loyal when we earn it. Rewards enrollment is non-negotiable — it's how we know who our best customer is. A store not hitting enrollment is leaving relationship data on the table. Coach it weekly, recognize it publicly."*

05 PEOPLE & OPERATIONAL EXCELLENCE — WEIGHT: 10%

- Hourly associate turnover — district target: "d45% annualized
- Manager-in-training (MIT) pipeline — at least 1 internal candidate per store
- Training completion rate — all new hires completed by day 30
- Payroll % of net sales — labor efficiency vs. plan
- Store standards compliance — visual, safety, and stockroom scores

> *DM Script: "Turnover costs us more than any marketing budget. When a store hits 60%+ turnover, customer experience degrades — you see it in NPS within 60 days. Invest in your managers; they're your multiplier."*

TOP INSIGHTS FOR YOUR FIRST 90 DAYS

1. Off-Price Is a Different Game

Bealls operates in the off-price segment — treasure-hunt merchandising, opportunistic buys, and value positioning. Your customer is price-conscious but quality-aware. Train your teams to educate on value, not just point to price tags. A high ATV in off-price means your team is selling the story, not just the ticket.

2. Seasonal Cadence Drives Everything

Florida's retirement and snowbird population creates strong seasonal swings — Q4 (Oct–Feb) is your highest-volume window. Make sure your stores are staffed, stocked, and operationally clean entering October. Missed Q4 is very hard to recover from in the annual scorecard.

3. Rewards Loyalty = Repeat Revenue

Bealls Rewards members spend 2–3x more annually than non-members. Your enrollment rate is a leading indicator of long-term comp performance. Stores below weekly enrollment targets need immediate coaching — role-play the ask with your managers on every visit.

4. Shrink Is Everyone's Job

At Bealls' price point and margin structure, 1% of shrink can wipe out a store's entire labor budget for the month. Create a culture of accountability without fear — associate awareness, consistent process (receipt checks, fitting room counts, daily cash close) matters more than camera placement.

5. Manager Retention Is Your #1 Lever

Research consistently shows store manager tenure is the #1 predictor of store performance. A store that has had 3 managers in 18 months is almost always in the bottom quartile. Protect your best managers with recognition, development plans, and direct advocacy to your Regional VP when they deserve a raise or promotion.

6. Your First 30-60-90 Day Plan

Days 1–30: Listen and observe. Visit every store. Build relationships. Don't change anything yet.
Days 31–60: Identify your top 2 stores and bottom 2 stores. Build action plans with store managers for underperformers.
Days 61–90: Execute on priorities. Set clear Q-goals with each store. Present your district roadmap to your Regional VP.

7. Scorecard Cadence — Know Your Rhythm

Weekly: Sales comp, payroll %, LP walk completion, Rewards enrollments.
Monthly: Margin, shrink alerts, NPS, turnover rate, training compliance.
Quarterly: Full scorecard review with Regional VP — come with data, trends, and a clear action plan for any metric below threshold.

"Before I go — what's one thing I can do for you this week? What's getting in your way that I can remove? [Listen fully, take notes.] Here's what I'm taking away from today: [Summarize 2–3 positives, 1 clear priority for follow-up.] You have a great team here. Let's keep building on what's working. I'll follow up on [specific item] by [date]. Thank you for your time today."

Send a written follow-up summary within 24 hours of every store visit. Document in your DM visit log.
