Payments (the payout pipe)

Pipe	Status	What it needs to go live	Done
PayPal Payouts	**ATTENTION**	Keys set but in SANDBOX mode. Needs LIVE Business credentials before real withdrawals work.	[ ]

Snapshot: **2 live** | **3 need a step** | **11 off**.

Postback (callback) URLs to set in each provider dashboard

CPX: https://api.cash-clip.app/api/surveys/webhook/cpx
BitLabs: https://api.cash-clip.app/api/surveys/webhook/bitlabs

Two things to remember

1. Every survey & offerwall pipe needs TWO secrets: an API KEY (to fetch offers) AND a separate WEBHOOK SECRET (to credit users when they finish). Miss the webhook secret and offers show but never pay out.

2. Biggest unlock right now: turn on one offerwall (Tapjoy) + get PayPal live. That completes the full earn-to-payout loop with real margin.
